To whom it may concern

The City of London 2040 Plan looks exciting. Thank you.

However, I am not finding sufficient space in and around new building developments to support healthy lifestyles and well-being.

I would like to see more green space at ground level. Specifically, I see the lack of it in the plans submitted for 45 Beech Street.

I would also like to find more focus on the restriction of light and noise pollution. There should be no smoking in the City.

There ought to be more public playgrounds for our youth and children and especially in our schools.

The definition of cycling needs to be clearly defined to include whether or not electric scooters etc. are included and potential paths ought to be built that are safe for pedestrians.

Public 24 hr available Lavatories ought to be included in all buildings.

Student and Homeless housing should be available too.

Finally, City Highwalks such as the Barbican Highwalks are quiet spaces where City residents and visitors can enjoy the birds and plant life in peace and walk safely without traffic. It is important for me that this is supported and continued.

Best wishes
