Chapter 13 Climate Resilience, Strategic Policy S15	<p>he chapter sets objectives that can not be delivered without access to the high voltage sub-mains and or strategic improvements to the sewer infrastructure to accommodate the predicted rainfall levels.</p> <p>"The policy as drafted makes no reference to the improvements required to the UKPN network to provide access to the high voltage ring mains within the City. Without it the ability of offices to use ""green"" electricity and move from the use of gas to electricity for heating is not possible and therefor the targets of zero carbon emissions are unachievable despite being set as goals within the plan.</p> <p>If global warming predictions are correct to terms of extreme weather conditions and in particular rainfall, the public sewers within the City will not be able to cope with the volume of water. The plan makes no reference to capital investment in the sewer infrastructure needed to manage the predicted levels of rainfall. "</p>	No	No	No
